ANAGHA MITHRA AINIPPULLY REMITH

COMPUTER SCIENCE & ENGINEERING / CYBERSECURITY

anaghahaaa@gmail.com • linkedin.com/in/anagha-mithra • github.com/1xynaa

EDUCATION

SRM Institute of Science and Technology

B.Tech, Computer Science and Engineering (Cybersecurity)

2025–Present · Kattankulathur, Tamil Nadu
First-year CGPA: 9.18 / 10.0

MES Indian School

Senior Secondary Education (CBSE) · Doha, Qatar

TECHNICAL SKILLS

Languages
Python · C · C++ · Java · JavaScript · TypeScript · SQL

Security
Linux/Kali · Nmap · tshark · Log forensics · IOC extraction · MITRE ATT&CK concepts

Web & Databases
Next.js · React · Node.js · REST APIs · Supabase · PostgreSQL · MySQL · HTML · CSS

Tools & CS
Git · GitHub · VS Code · IntelliJ IDEA · OOP · Data Structures & Algorithms

AWARDS & INVOLVEMENT

• **First Prize** — Creative Ingenuity ’25, SRMIST (Nov 2025).

• MindCraft Computing Challenge — Participant, Carnegie Mellon University Qatar (May 2023).

• **Deputy Head, Event Management** — International Relations Club, SRMIST.

• Active Member — Astrophilia Club, SRMIST.

• TryHackMe Linux Fundamentals — completed.

HACKATHONS

Industry Games — Industry Connect Hackathon 2026
Semifinalist · NEXUS

Forensic Frontiers 2026
Participant · 28-hour cybersecurity & digital forensics hackathon · KILL CHAIN

AI GAME JAM 2026
Qualified for Round 2 · Team CLOUD FOUR · MURDER.EXE

PitchQuest — Alexa Developers SRM
Top 10 teams

SELECTED PROJECTS

NEXUS

Enterprise Collaboration & Intelligence Workspace

Built a role-based workspace for tasks, orders and operational analytics, with authenticated API routes and PostgreSQL row-level security.

Stack: Next.js · React · TypeScript · Supabase · PostgreSQL

KILL CHAIN

Agentic Cyberattack Reconstruction Platform

AI-assisted SOC prototype that analyses packet captures and authentication logs to build attack timelines, extract IOCs and map activity to MITRE ATT&CK and the Lockheed Martin Cyber Kill Chain.

Stack: Node.js · OpenAI API · Nmap · tshark · Kali Linux

MURDER.EXE

Interactive Cyber Forensics Mystery

A team-built cybersecurity mystery using clues, puzzles and digital evidence. Created with Team CLOUD FOUR for AI GAME JAM 2026; qualified for Round 2.

Stack: Cybersecurity concepts · Interactive web experience

SARA

Stock Analysis and Recommendation AI

Frontend concept for stock analysis, market-data visualisation and trend-analysis workflows.

Stack: HTML · CSS · JavaScript · Git

PROFILE

Computer Science (Cybersecurity) student interested in building practical software and understanding how systems work beneath the interface. Exploring application development, security fundamentals and digital forensics.

Curious by nature, hands-on by choice, and always learning through building.
